

Grow with Alta Internships

Customize your Alta internship to help you reach the goals you've set for yourself. Here, our previous Alta interns share their internship experiences in the areas of genetic management and consulting, sales and marketing.

"The Alta internship helped me realize each herd has different goals and management strategies. A specific genetic plan can improve profitability and genetic progress while meeting the goals of any dairy. This internship prepared me for my current role with Alta as I gained experience with progressive dairies, managed my own schedule, and developed relationships across the US and Canada."

-Jason Zimmerman, Virginia Tech
Previous Eastern US Alta Advantage Intern, current Alta District Sales Manager

"The Alta team helped prepare me for a successful internship with in-depth training, steady communication, and one-on-one mentoring. I enjoyed meeting such a vast variety of progressive dairymen, all with different types of personalities, yet still pursuing a similar goal. Alta's unique opportunity of building my own internship won me over!"

-Brooke Moe, Washington State University
Previous Northwest US Sales Intern, current Alta District Sales Manager

"I would recommend this internship to anyone that has a passion for the dairy industry and is looking to gain knowledge in reproduction and DC305. During my internship with Alta I had the luxury of working with large progressive dairy farms on the east coast, which helped further my knowledge of reproduction and analyzing farms within DairyComp 305. I see Alta shows a true partnership with the herds they work with."

-Mackaully Blair, Michigan State University
2016 Atlantic US Sales Intern

Build your perfect internship

Choose from one or any combination of the following focus areas to create a customized and rewarding internship with your skills and career goals in mind.

Alta Advantage

Travel within a multi-state region to numerous Alta Advantage partner herds, which average 1,000 cows. You'll get to implement customized genetic plans, provide performance reports using DairyComp 305 or PCDart, assist with Holstein Association SET evaluations and select daughters for professional photography.

Reproductive Management

Develop your understanding of advanced herd reproductive strategies with thorough hands-on experience. You'll be able to assist with pregnancy diagnosis, artificial insemination, tail striping, heat detection and monitoring herd reproductive performance using DairyComp 305 in herds averaging 2,000 cows.

Sales

Work with our current network of Alta District Sales Managers and Elite Account Managers to build your own portfolio of Alta accounts. Provide genetic and reproductive consulting advice and develop customized solutions for current and prospect progressive dairy farms.

Marketing & Training

Enhance your skills in all areas of marketing, communications and training by promoting Alta through online, print and video communication pieces focused toward internal Alta staff and progressive dairy producers worldwide.

Saskatoon Colostrum Company

Work with the team at our sister company, SCCL, on new research projects to advance the health and productivity of neonatal calves. Or use your sales and marketing skills to promote SCCL products through trade show involvement and producer and vet meetings. SCCL is a biosciences company specializing in the development and production of innovative products using dairy cow colostrum.

Valley Agricultural Software

Develop your understanding on current VAS products and software including DairyComp 305, Feed Watch, Parlor Watch, Pocket Cow Card, and more. This internship, hosted by our sister company, VAS, will increase your knowledge, awareness and efficiency with dairy herd management software and practical application in every day, on-farm use.
