

2022 Internship: Genetic Services

STgenetics® is the preeminent sex-selecting service provider for livestock breeders, ranchers and farmers worldwide who seek to maximize their herds' productivity and efficiency through artificial insemination breeding techniques.

Location & Hours:

Middleton, WI

Monday – Friday, 8:00 A.M. – 5:00 P.M.

Some travel is required.

Overview:

The selected intern will gain knowledge and experience with genomic testing and the role it plays in matings and overall herd management. They will work hands-on in the entire process from sample collection and data submission to results delivery and analysis. They will obtain on-farm experience with herds from 100 to 100,000 cows across the United States. They will learn about Chromosomal Mating™—the innovative mating tool from STgenetics® and use it to perform genomic matings.

Strong computer skills and experience with herd software and data analysis is preferred.
